Subject: Fwd: [EXT] Invite - Global Infrastructure Leadership Forum

Dear Ambassador,

I hope this finds you well.

Further to your earlier conversation with Robert Kapla (copied here), I am forwarding to you an email from Norman Anderson who heads the Global Infrastructure Leadership Forum and who has invited the government of Angola to present three infrastructure projects at the conference.

As you will see from the email below, Secretaries Mnuchin and Chao will be keynote speakers at the conference which will include many participants who need to be exposed to and understand the new Angola and the opportunities for trade and investment.

Please let me know if you need any further information or documentation.

Best, Manana

Dear Angela:

This is a quick update on our 13th Global Strategic Infrastructure Leadership Forum progress - which will take place on March 25-27th! We have a number of new developments, the most important of which is that Secretary of Transportation Elaine Chao will address the Forum during the luncheon on March 26th. More than 40 projects have confirmed. All events will take place at the Pierre Hotel, New York City.

Project confirmations this week include: LDOT's Calcasieu River Bridge, 5 projects from the Government of Sao Paulo, 5 projects from the Brazilian Federal Government, and the Tanger Med Port project from Morocco. Stay up-to-date on confirmations by visiting the [Global Forum page](#).

As you know, the Forum is a lively, interactive, event focused on the Top 100 global infrastructure projects (over \$500 billion in project value), with participants and projects from nearly 30 'high yield' infrastructure countries around the world.

Kicking-off the Forum, Maria Bartiromo will interview Hank Greenberg and David Petraeus, highlighting critical domestic and international infrastructure opportunities and challenges. We will also dig deep into the Gateway project, and host the Top 5 Strategic Global Infrastructure projects, all prior to Sec. Mnuchin's luncheon keynote address.

The Forum brings thought leaders together around the top global project and critical infrastructure themes (in terms of technology, like smart cities; and in terms of investment). We also host a series of 'deal sessions' lead by the new U.S. Development Finance Corporation. Click here for the updated [Agenda](#).

The Forum is an important and rare opportunity for U.S. public and private sector participants to develop a better understanding of the state of play of global infrastructure and to gain not only new insights, but new business and strategic relationships.

10:00 - 10:45 AM

Bringing Institutional Investors to the Fight – What is Required?

There is an enormous challenge in bringing institutional investors, including pension funds, sovereign wealth funds and life insurance funds to the infrastructure funding gap. Not only do we need a much better pipeline of projects, but we also need much more capable decision-makers in the funds themselves. Currently only 2% of funding goes to infrastructure, and doubling that to 4% would bring a whole new level of strategic capability to long-term infrastructure investment. How do we do that?

Dear Ambassador,

Also further to your earlier conversation with Robert Kapla, I am forwarding the invitation to the Export-Import Bank Annual Conference which will take place on April 2 and 3 in Washington.

We have encouraged the Government of Angola to send appropriate representatives given that the conference is attended by U.S. exporters, banks and other important players in the area of export finance which will be critical for Angola's engagement with US companies and attracting trade and investment.

Again, please let me know if you need further information or documentation.
